SUPERIOR PERFORMANCE

**A new chapter in construction equipment has begun.
Making the dream a reality.**

IPC(Intelligent Power Control) NEW

A new hydraulic system(IPC) has been applied. It is able to optimize pump flow rate and power at the various working condition through the individual pump control. Through this system, daily fuel consumption has been reduced up to 5%(varies by mode).

BETTER FUEL-EFFICIENCY

Levelling 6%

Truck loading 3%

BUILT FOR MAXIMUM POWER, PERFORMANCE, RELIABILITY.

Hyundai 6BTAA-5.9(HM5.9) Engine

The six cylinders, turbo-charged, 4 cycle, charger air cooled engine is built for power, reliability, economy and low emissions.

Reinforced Bucket and Bucket Linkage

Sealed and adjustable bucket linkage provides less wear of pins and bushes as well as silent operation. The design includes bucket link durability and anti wear characteristics. Additional reinforcement plates on cutting edge section. Reinforced bucket is made with thicker steel and additional lateral plate.

Powerful and Precise Swing Control

Improved shock absorbing characteristics make stopping a precise and smooth action.

"A More Reliable Way To Reach You Dream."

The Hyundai 6BTAA-5.9(HM5.9) engine has been designed with 40% fewer parts than the competition. The weight of the machine is reduced without sacrificing strength. You get a proven power plant that meets ecological concerns, without paying a premium for technology you don't need.

Strong and Stable Lower Frame

Reinforced box-section frame welded, low-stress, high-strength steel. guarantees safety and resistance against external impact when driving on rough ground and working on wet sites through high tensile strength steel panels, with highly durable upper and lower rollers and track guards. (HX210/220HD+ : Reinforced idler cover applied)

Increased stability Upgrade

Standard counterweight has been increased by 200kg. This increases stability and lifting capacity.

Single Layer Cooling System

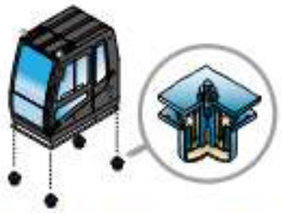

1. Improved cooling performance by changing over to 3 column type structure in a row
2. Easy to clean without disassembling anentire radiator total assembly

Breaker mode flow setting system

NEW Option

Maximum flow of breaker piping can be set through cluster.

Operator's comfort foremost.
Wide cab exceeds industry standards.

Minimization of Shock and Vibration through Cab Mounting System

The application of Viscous Mounting to the cabin support provides the operator with a much improved ride. The operator work efficiency will increase as the shock and noise level in the cabin decreases.

Rear view camera Option

Additional work lamps Option

- 2 x Cabin lights
- 2 x Boom lights
- 1 x Rear lamp

Improved Intelligent Display

Upgrade

Newly installed 7" wide cluster improves operator's visibility. It is easy to check all critical system with easy-to-read indicators. This cluster is user-friendly as it can display 13 local languages.

Easy-to-Reach Control Panels

Switches and other essential controls are located near the operator.
This helps keep operator movement to a minimum, enhancing control with less operator fatigue.

Highly Sensitive Joystick and Easy Entrance

New joystick grips for precise control have been equipped with double switches.
- Left: One touch deceleration
- Right: Horn / Optional

Smooth Travel Pedal and Foot Rests

Air compressor Option

COMFORTABLE OPERATION

Operator's comfort is our top priority. The HX Series is designed with the operator in mind. The spacious cab exceeds industry standards.

Wide Cab with Excellent Visibility

The cab is roomy and ergonomically designed with low noise level and good visibility. A full view front window and large rear and side windows provide excellent visibility in all directions.

Easy to Maintain Engine Components

The cooling system is provided for optimum operation, guaranteeing longer life for the engine and hydraulic components. Servicing of the engine and hydraulics is considerably simplified due to total accessibility.

Centralized Filter Arrangement Upgrade

Several filters are gathered in the pump room area for easy service. (Pre-filter with priming button, fuel filter, engine oil filter and hydraulic oil return filter) Large capacity pre-filter is provided as a standard.

Centralized Electric Control Box and Easy Change Air Cleaner Assembly

Electric control box and Air cleaner are centralized in one or the same compartment for easy service.

Side Cover with Left & Right Swing Open Type

Easy access to vital components gives unrestricted view of component allows easy maintenance and repair.

Breaker line return filter Option

This filter can protect hydraulic components by filtering out impurities from breaker.

HiMATE Option

IT'S CONVENIENT, EASY AND VALUABLE

Hi MATE Hyundai's newly developed remote management system, utilizes GPS-satellite technology to provide customers with the highest level of service and product support available. Hi MATE enables users to remotely evaluate machine performance, access diagnostic information, and verify machine locations at the touch of a button.

WHAT IS BENEFITS

Increase Productivity

It helps you operate machines in efficient. You can check the difference between total engine hours and actual working hours. See how productive your machines are and plan any required cost saving solutions. Hi MATE offers working information such as working / idling hours, fuel consumption and rate.

Convenient and Easy Monitoring

There is nothing much to do to monitor your machines. Just log on to the Hi MATE website or mobile application. Hi MATE allows you to watch your machines whenever and wherever you are.

Security

Protect your machines from theft or unauthorized usage with Hi MATE. If the machine moves out of the Geo-fence boundary, you will get alerts.

SERVICEABILITY AND EASY MAINTENANCE

New Cabin for More Comfort.
